

Northern European Studies – and then what?

A video series on career prospects by j o l n e s

Transcription episode 8: Language school founder

Silja van Teijlingen, Alumna University of Cologne

What was your favourite seminar?

The best seminar I can still remember was about contemporary Scandinavian television narratives and we went to the University of Amsterdam together and I gave a lecture or a presentation on the subject of film noir references in *Forbrydelsen*. And for me it was a totally exciting experience to deal with another university and then to really go on this excursion together, which was totally exciting for me and it was really a lot of fun.
